EXPERIENCE

Data Infrastructure Intern | LinkedIn

Winter 2017 | Sunnyvale, CA
Java 8, Kafka, MySQL, Ambry

- Worked on Vector - the **media processing** infrastructure for uploading, processing, managing, and serving multimedia content
- Designed, built, and released a distributed **E2E processing validation** and **performance testing** framework from scratch for the media infrastructure
- Framework generates traffic, collects processing metadata and produces metrics, monitors the pipeline, and validates the processed data
- In use by multiple infrastructure teams for performing quality/performance experiments, collecting key metrics, and monitoring failures

Software Engineering Intern | Yahoo!

Spring 2016 | Sunnyvale, CA
Node.js, React, Fluxible, MySQL, ES6, Perl, AWS

- Created and launched **Yahoo! View** (view.yahoo.com) within 7 weeks as part of the web team; implemented various core business logic and UI components
- Optimized API endpoints and integrated AWS CloudSearch for improved performance; reduced avg response time to under **200ms** and increased max QPS capacity by **30x**
- Integrated **Tumblr** with Yahoo! View to provide official and fan content related to shows
- Setup the entire backend integration testing infrastructure for Yahoo! View

Mobile Developer | Rave Media (WeMesh)

Fall 2015 | Waterloo, ON
Android SDK, Retrofit, ExoPlayer

- Developed and launched the Android client with a team of 5 developers; over **100,000** installs on Google Play Store
- Implemented the capability to fetch and create nearby local groups for watching synchronized videos; implemented automatic and manual video quality selection
- Worked closely with the designer to build an **interactive** orientation carousel for improving the user onboarding experience

Web Developer | Martello Technologies

Winter 2015 | Ottawa, ON
Java Spring Framework, Hibernate ORM, PostgreSQL, JSP

- Implemented the capability to **monitor** and **report** SIP-based VoIP traffic; detects performance and availability issues in real time
- Designed and built a **stateless** account recovery system using HMAC

PROJECTS

Angora | Node.js, Angular, MongoDB, Jade/Pug, Less

January 2016

An online platform to help users explore hairstyles and review local hairstylists

Terre | C++, Cocos2d-X

February 2015

A cross-platform physics simulation of star systems with dynamic lighting effects

Simple.Click.Search. | Chrome Platform API

August 2014

A Chrome extension that allows users to search plain text with a simple click or highlight

SKILLS

Languages

- JavaScript
- HTML / CSS
- Java
- C / C++
- Python
- Bash

Frameworks

- Node.js
- React / React Native
- Angular
- Express
- Mocha
- Fluxible
- MobX
- JQuery
- Kafka
- Less / Sass
- Android SDK
- Java Spring Framework

Databases

- MySQL
- PostgreSQL
- MongoDB

Tools

- Firebase
- Git
- SVN
- Maven
- Grunt
- Webpack
- Splunk

EDUCATION

University of Waterloo

Bachelor of Software Engineering
Sept. 2013 – present

INTERESTS

- Build apps
- Make music
- Catch pokémon
